EASY CLEAN

By
Easy Clean, LLC

You know that headache of cleaning out the sludge from your SLAB SAW. **NEVER AGAIN!!!** The Easy Clean cleans and recycles your saw oil. With it in use on your slab saw, you may never need to clean the sludge out of your saw again.

Easy Clean acts like a centrifuge and collects the sludge in a metal 1 gallon paint can that obtains a putty like consistency. The equipment can be used on a single saw of multiple saws. (I am rigging mine to service 4 saws.) Runs on 110 Vac. Power from a normal wall outlet and consumes about 500 watts (1/2 Hp.).

System available 2 ways, complete sludge separation unit with no accessories or the complete sludge separation unit with accessories. Accessories include oil pump, fittings, tank strainer hook-up hose and fittings.

LS18 SLAB SAW By Lortone

This rugged, accurate and economical 18" slab saw has been proven by years of trouble free performance in commercial operations. Convenient free standing design allows it to go next to a work bench. The frame, drive guard and tank are constructed of heavy gauge welded steel for long life. Easy access is provided by the hinged hood making loading and set-up simple. The side window permits monitoring of the cut. Features shutoff switch, threaded cross feed, sealed ball bearings and adjustable feed rate of 9 1/2" to 19 1/4" per hour. A large capacity vise holds 7" high X 7" long rough. The cross feed allows several cuts without repositioning. Complete with MK-303 18" X .125" X 3/4" sintered rim blade, 1/2 Hp. overload protected ball bearing motor, 115 VAC and 2" drain. Saw requires 3 1/2 gallons of cutting oil. **OIL BASED CUTTING FLUIDS ONLY!!!**
