Diamond belts last many times longer than silicon carbide belts. (Sometimes up to 50 or more times longer.) There is also much less mess with diamond belts. Diamond belts also cut much faster than silicon carbide belts. Also please note that the finish is different on the 2 different types of belts. As a rule of thumb a 600 Mesh Silicon Carbide belt produces the same finish as a 1,800 Mesh Diamond Belt.

**DIAMOND FLEX WHEEL /
DIAMOND BELT BREAK IN STICK**
Flexible resin bonded diamond wheels and diamond belts need broken in to operate correctly. Basically you need to burn the resin off of the diamond faces. This special pure aluminum oxide stick is made just for that application.

To use, just pass over the face of the wheel/belt for 20 to 30 seconds. **USE LOTS OF WATER!!!**

BREAK-IN STICK

MLS PART#: 622010

PRICE: \$7.00
