BACKING PLATE - A precision laser cut Lucite backing plate used to back up thin polish discs, diamond Toppers Sanding discs and silicon carbide discs. Manufactured to exact precisions, flat and parallel within .001". Arbor hole 1/2" diameter.

SPONGE PAD - 1/8" thick sponge pad with pressure-sensitive adhesive (PSA) backing. Use under diamond sanding disc, felt pads or white polish pads to cushion and help remove flat spots from cabochons. NO HOLE!

WHITE POLISH PAD - A polish pad used by cutters who want to charge their polish disc with diamond compounds or oxide polishes to achieve a mirror polish on their gemstones or glass. These pressure-sensitive adhesive (PSA) backed pads are a great substitutes for leather and felt discs. NO HOLE.

CERIUM OXIDE PAD - Put a mirror polish on stone or glass. Pre-charged pad, use with water, (PSA) backing. NO HOLE.

NOTE: The **ROTARY FLAT LAP** in its various incarnations has turned into my handiest lapidary tool. I not only cut "cabs" on it, I also do a lot of face polishing. What I use my wheeled arbor for is to "HOG" off large quantities of rock to shape my stone. I then use my **DIAMOND FLAT LAP** to do the delicate finish work including finish grinding, sanding and polishing.
