EASTWIND Diamond Belts are a favorite with Opal cutters. They provide a "less" aggressive action that a Nova wheel. They will provide a superior polish for this class of resin bonded diamond abrasive.

DIAMOND FLEX WHEEL / DIAMOND BELT BREAK IN STICK
Flexible resin bonded diamond wheels and diamond belts need broken in to operate correctly. Basically you need to burn the resin off of the diamond faces. This special pure aluminum oxide stick is made just for that application.

To use, just pass over the face of the wheel/belt for 20 to 30 seconds.
USE LOTS OF WATER!!!
BREAK-IN STICK
